

At ITFO, we are in the business of **connecting** people.

SharePoint Developer

With more than ten years of experience behind us, we are proud to work with an amazing group of clients who count on us to keep their business moving forward. We take a creative and data-driven approach to provide technical and digital enterprise-scale collaboration solutions for some of the largest companies in the world.

Headquartered in beautiful Victoria, BC, we are a diverse team with a common drive to exceed our customers' expectations by providing bespoke, customized tools and a seamless, positive experience working with us as our customer

We endeavor to engage highly-skilled, passionate and smart people to work with us. In support of this commitment, we offer a remote, distributed workplace model which allows our team members more time to devote to passions both at work and at leisure. Where possible, we also offer flexible work arrangements (eg reduced hours and/or contract-specific engagements) in consideration of our team members' lifestyle requirements.

We are currently seeking a **SharePoint Developer** to participate in the analysis, design, development, testing and implementation of enterprise-scale content management systems.

Primary Responsibilities:

- Configure SharePoint solutions, features, sites, workflows, web parts and master pages
- Configure and troubleshoot SharePoint security groups, permissions and settings
- Manage SharePoint content databases
- Help design and enhance the look and function of SharePoint sites
- Migrate content into SharePoint and upgrade SharePoint to new versions
- Apply company brand guidelines to SharePoint master pages, page layouts and templates
- Create custom business forms and workflows using SharePoint, InfoPath, .NET, Visual Studio and Nintex
- Configure web parts, including search and content query web parts
- Create solutions that enable connections between SharePoint sites and databases
- Create Business Intelligence (BI) solutions and operational dashboards that show key performance charts, graphs and data visualizations

Desired Qualifications:

- Microsoft developer certifications (MOSS, MCSD, MCDBA, Certified SharePoint Developer, Certified SharePoint Administrator)
- Consulting experience

Knowledge and Skill Requirements:

- Proven development ability in web technologies such as jQuery, HTML5, PHP, XML, CSS, IIS, .net and AJAX
- Knowledge of the .NET Framework and experience working in the full Software Development Life Cycle (SDLC)
- Familiarity with Angular JS and REACT JS

Please respond with an updated resume that highlights relevant experience in the areas noted.

Team members usually work from their own office locations, though it will be beneficial if you have the ability to join occasional face-to-face meetings at our head office in Victoria, BC.

We thank everyone for their interest in working with us at ITFO Communications, but only those candidates who are short-listed will be contacted.
